Product Manager / Product Owner

# Mads Dixen

Product development · User insight · Information security

Aarhus, Denmark mads.dixen@gmail.com +45 31 31 38 68 linkedin.com/in/madsdixen

## PROFILE

Product Manager with experience in digital student administration systems, UX and information security. At Aarhus University, I work with the team to translate user needs into priorities, requirements and coordinated system changes. With an MSc in ITKO and practical technical understanding, I connect users, IT and vendors from requirements discovery through testing and reliable operations.

## PROFESSIONAL EXPERIENCE

### Product Manager

2024 - Present

Studiesystemer, Aarhus University · Full-time

Part of the team supporting student administration systems, including digital examinations and evaluations.

- Contribute to roadmap and backlog prioritization and the planning of upgrades, testing and quality assurance.
- Translate needs from faculties, operations and support into clear requirements and decision support in collaboration with vendors.
- Coordinate changes across IT, educational administration and system vendors with focus on stable operations.
- Clarify integrations, data requirements and the impact of changes across a complex system landscape.

> **Local Information Security Coordinator** 2024 - Present
>
> AU Uddannelse
>
> - Coordinate local ISMS activities, awareness, asset overview, risk assessments and reporting.
> - Contribute to work on ISO 27001, NIS2 and GDPR in collaboration with central IT.

### Cybersecurity Consultant

2024

IQ Metal - Integrated Metal Solutions · Internship

Hands-on work with information security, risks and implementable security measures in a manufacturing company.

- Developed security policies, procedures and awareness material with focus on practical use.
- Conducted risk assessments and vulnerability analyses as input for security prioritization.
- Translated compliance requirements and technical risks into concrete recommendations for management and employees.

### UX Designer

2024

Wakeque · Internship

Product-oriented UX work on onboarding and customer journey for a vertical SaaS product.

- Mapped user needs and improvement opportunities in the onboarding flow through research, wireframes and prototypes.
- Collaborated with developers to turn user insight into implementable product improvements.
- Proposed clearer user flows with a focus on alignment between product value and interface.

## SKILLS

### Product

Roadmaps · Backlog · Prioritization · Requirements · Release and upgrade coordination

### Delivery

Agile/Scrum · Testing and QA · Process optimization · Vendor collaboration · Quality assurance

### Discovery & UX

User research · Customer journeys · Wireframes · Prototypes · User-centered design

### Technology, data & governance

Integrations · Data quality · Information security · ISO 27001 · NIS2 · GDPR

### Technical understanding

Familiar with Azure, Power Platform, API management, SQL, JavaScript, Python and C#, as well as automation and AI tools. Apply this background to clarify data requirements, integrations and risks with developers, operations and vendors.

## EARLIER EXPERIENCE

**Teaching Assistant, Software Development** 2022 - 2023

MSc ITKO, Aarhus BSS · Part-time

- Facilitated exercises, gave assignment feedback and helped students understand software development in practice.
- Strengthened the ability to explain technical topics clearly to non-specialists.

**ISO 27001 Consultant** 2021

ApplicateIT · Internship

- Worked with the ISO 27001 standard and contributed to building and operating an information security management system.

## EDUCATION

**MSc - IT, Communication & Organization (ITKO)** 2021 - 2023

Aarhus BSS, Aarhus University

**BA - Digital Design, IT, Aesthetics & Interaction and Information Studies** 2017 - 2020

Aarhus University

**AP - Service, Hospitality & Tourism Management (Sport & Event)** 2015 - 2017

Dania - Business Academy
